Dr. Dr. Brian D. Ray is president of the National Home Education Research Institute ([www.nheri.org](http://www.nheri.org)) and internationally known for his educational research that focuses on homeschooling (home education, home-based education). He has published many peer-reviewed articles, books, and chapters in books. Dr. Ray has been interviewed extensively by major media in the USA and from other nations. He serves as an expert witness in courts and legislatures. Dr. Ray is a former professor of science and education at the undergraduate and graduate levels, teaching courses in research methods, statistics, science, education. He is also a former classroom teacher in public and private schools, and has taught homeschool students in various venues. He holds a B.S. in biology from the University of Puget Sound, an M.S. in zoology from Ohio University, and a Ph.D. in science education from Oregon State University. He and his wife Betsy home educated all of their 8 children through their secondary years, they have 18 grandchildren, and they live on a small farm in western Oregon.

*If you have an interest in or concern about the “outcomes of home education,” think that homeschooling is bad for society (or good for society), or you are a veteran homeschooler who just needs a little morale boost, you won't want to miss this presentation. Good books and other relevant resources will be available.*
