

# New Class

## 2<sup>nd</sup> Semester

### Introduction to Computer Programming

**Monday, 11:40am - 12:30pm**

**Instructor: Loy Myers**

This class is for high schoolers who wish to learn the basics of computer programming. The computer language we will learn is called Python. It is a very popular language used by many large companies such as Google and Facebook but is also one of the easier languages to learn. Better yet, it is free to download.

All students confirmed in the class will be sent download instructions. If you have a laptop, you can bring it to class, but it's not necessary. There will be no tests for the class, but we will complete required exercises and projects as described in the book we will use – *Python Crash Course 2<sup>nd</sup> Edition* by Eric Matthes.

You must have access to a computer that can run Python. Before you sign up for the class, go to the website <https://www.python.org/> and verify that your computer can run the latest version of Python. For Windows users, you need at least *Windows 8*.

# More 2<sup>nd</sup> Semester Classes Available

### **Genesis 101: Understanding Creation, the Flood, and Babel**

*Taught by various MAC\* Instructors*  
**Monday, 9:30-11:00am**
